EXPERIENCE

 **Azure Support Engineer**, App Services
Microsoft US | 📍 Charlotte | 2020 - Present

Support the performance side on the Azure App Services team. Worked with Microsoft customers to fix performance issues on their App Services. Advising customers on how to optimize performance and increase availability for their apps in the cloud. Document technical work and research to help my colleagues, improve product and improve the support experience. Maintain a proactive approach to customer happiness, identifying customer satisfaction concerns and managing customer expectations.

Tech Stack: Web App troubleshooting, IIS 7, Azure Services, Linux, JavaScript, Node, .NET Core, ASP.NET, C#, REST API, DNS, SSL

 **Software Engineer**, Intermodal Gate System
NASCENT Technology | 📍 Charlotte | 2018 -2020

Designed, developed and delivered software to Intermodal port companies while working in an Agile environment. I helped scale the Port of Virginia project to include the In Yard gating processes which increased revenue for their company by a large margin. Designed and delivered the Ingate/Outgate system for the Port of San Juan Puerto Rico. Helped design and deliver the Ingate/Outgate system for the South Carolina Ports Authority. Supported customers on maintaining their software and reacted to problems relating to mission critical processes and mitigating them. Worked with the customers to flesh out requirements, communicated the development progress and supported live testing. On-site support for customers deployments into UAT and Production environments. Created windows applications, API services, web applications and integrated them with hardware devices.

Tech Stack: React, React Hooks, Typescript, Asp.Net, C#, VB.Net, MS SQL

 **React Developer** (Contract), Business Promos
Marlo Holdings LLC | 📍 Charlotte | 2018 - 2019

Designed and managed websites using the React and Next.js framework. Focused on SEO (Search Engine Optimization) and made high ranking sites on Google.

Tech Stack: HTML/CSS/JavaScript, React, Next.js

MY PHILOSOPHY

Live a story that is worth telling & inspires others
