## EDUCATION

---

### Furman University

Bachelor of Arts in Information Technology

### University of North Carolina Charlotte

Coding Bootcamp

Jun 2012 – Dec 2016

Greenville, SC

May 2018 – Aug 2018

Charlotte, NC

## EXPERIENCE

---

### Microsoft Azure Support Engineer - Microsoft | Charlotte, NC

Feb 2020 – Present

- Worked with Microsoft customers to fix performance issues and troubleshoot their .Net applications and Function Apps in Azure App Services.
- Advising customers on how to optimize performance and increase availability for their apps in the cloud.
- Document technical work and research to help my colleagues, improve product and improve the support experience.

### Software Engineer - NASCENT Technology | Charlotte, NC

Feb 2020 – Present

- Designed and implemented an automated gate system for intermodal port companies.
- Developed **Windows Forms** Applications, **REST API** Services and **ASP.Net** web apps using a combination of **C#, VB.Net, React/Redux/Hooks**.
- Provided on-site support for customers' deployments into UAT and Production.
- Integrated the software with hardware devices such as RFID readers, barcode scanners, ticket printers and OCR portals which read the numbers on the containers.
- Worked with big intermodal companies such as South Carolina Port Authority, TraPac Port of Los Angeles, Port of San Juan, NIT Port of Virginia and others.

### Web Developer – Marlo Holdings LLC | Charlotte, NC

Aug 2018 – Present

- Designed and managed websites using the **ReactJS** and **NextJS** framework.
- Focused on SEO (Search Engine Optimization) and made high ranking sites on Google.

## PROJECTS

---

### Financing App

Aug 2023 – Present

- A personal finance app that helps you budget and track finance needs.
- This app was developed with ReactJS/Redux, C#, .Net 6, MS Entity Framework, Material UI.
- This site is hosted on Azure App Services, repo in Azure Devops and GitHub.

### Crown Clothing

July 2023 – Sep 2023

- A ecommerce clothing website that is developed using ReactJS/Redux, Stripe, Firebase and SASS.
- This is in demo mode but has the capability to complete transactions.

- Hosted on Azure App Services, repo is in GitHub.

### **Nature Tours**

**May 2023 – June 2023**

- A nature outdoors website that displays the beauty of outdoors with interactive CSS and a very slick design.
- Hosted on Azure App Services, repo is in GitHub.

- Maintain a proactive approach to customer happiness, identifying customer satisfaction concerns and managing customer expectations.
